UNCLASSIFIED

Executive Officer, Pharmacy Board of Australia,
G.P.O. Box 9958, MELBOURNE VIC 3001

In respect of the following proposed references:

   f. a paediatric pharmacopoeia published by an Australian teaching hospital
   g. an evidence-based reference work on complementary and alternate medicines

I submit that those references, respectively, should not be necessary for practices which do not:

   • provide health care to children.
   • provide complementary and alternate medicines.

In other respects the guidelines are appropriate.

regards,

E.J. (John) Hatfield
